Javier Guerra
Software developer

Passionate student looking for opportunities to join the workforce and gain real-world experience. I have the ability to accomplish tasks efficiently, both in individual environments and in collaborative teams. My commitment and reliability allow me to add value from day one, and I am eager to learn and grow with your company.

I invite you to explore some of the projects I've worked on in my GitHub repositories. These examples can provide a more detailed insight into my skills and achievements thus far.
